Full Service Real Estate Investment Management

We offer property owners a one-stop shop in managing their investment properties at an affordable price and with the highest level of service in the industry. Our expertise is in leveraging advanced tools to maximize rents and the market value of your property.

Who We Are

Hearthfire Holdings is a family-owned real estate investment and property management operation founded by Sergio and Corinn Altomare. Our business was founded in 2012. Our founders and advisory team have been investing in real estate for over 30 years in markets across the country. We began investing with a single triplex in 2012 and have grown to syndicate and manage a mix of residential, commercial, and self storage properties. Our background is in information technology, which allows us to leverage the best tools available for all of our operations to ensure optimal exposure in leasing, as well as efficient and effective operations for property management. This has given us a considerable advantage over many smaller firms in the industry, while enabling us to compete with much larger firms.

Sergio is a licensed realtor, and we are actively in pursuit of establishing a full-service brokerage that focuses on investment properties.

Our Clients and Units We Manage

Our clients are active investors with multiple investment properties. Our clientele diversity proves our ability to fit with any investment requirement.

Our Insurance Policy

We carry General Liability and Errors & Omissions Insurance policies of \$1,000,000 per incident with a \$2,000,000 aggregate coverage. This provides you comfort in knowing we will accept responsibility for managing your greatest assets.

Our Core Values

- To serve and shelter life's treasures.
- To deliver genuine, caring service through our personal commitment.
- To improve as many lives as possible.

Thank you for your interest in our company. We look forward to partnering with you for a successful future!

Regards,

Sergio and Corinn

INVESTMENT MANAGEMENT

As real estate investors ourselves, we are committed to a partnership and enhanced services anchored in investment stability and growth. We offer all of our clients direct access to custom and tailored strategies that meet their needs today and in the future.

Depending on your life stage and risk appetite, there are three main objectives of investment: safety, growth, and income. Every investor invests with a specific objective in mind, and each investment has its own unique set of benefits and risks. As you'll see, our partnership goes above and beyond what traditional brokers and property managers can offer.

Let us understand these objectives in detail.

SAFETY

While no investment is completely risk free, we implement real estate strategies to balance returns with risk tolerance. This may mean investing with an objective of keeping your money safe, irrespective of the rate of return they receive on their capital.

GROWTH

While safety is an important objective for many investors, most invest for long term gain on capital and equity, which means you want the invested amount to grow.

There are many asset classes and strategies that offer this benefit, regardless of where we are at in a market cycle.

Although it is important to note that capital gains attract taxes, real estate offers many options to reduce, avoid, and defer taxable events.

INCOME

Real estate offers an incredible benefit of generating additional sources of income. Consequently, such strategies target asset classes and an approach focused on cash flow, often with no or minimal tax implications.

OTHER OBJECTIVES

While the aforementioned objectives are the most common among real estate investors today, some other objectives include:

TAX INCENTIVES

Real estate investing offers quite a number of tax benefits. For example, there are many deductions and depreciation strategies to reduce or eliminate income tax on cash flow.

Under Section 1031 of the United States Internal Revenue Code, a taxpayer may defer recognition of capital gains and related federal income tax liability on the exchange of certain types of property, a process known as a 1031 exchange.

A charitable remainder trust is a tax-exempt irrevocable trust designed to reduce the taxable income of individuals by first dispersing income to the beneficiaries of the trust for a specified period of time, then donating the remainder of the trust to the designated charity.

LIQUIDITY

Although real estate is considered illiquid, a strategy optimized for growth can provide many opportunities to enable portfolio growth without the need for additional capital injections. Some examples include the ability to tap into property equity through income optimization, forced equity, appreciation and debt pay-down.
